Stranraer

Dumfries

Coccion's fit out in Dumfries has transformed a typical dentists practice into a bright, modern and friendly environment. The reception areas and clinics incorporate bespoke joinery work which combine essential practicality with a strong visual appearance.

How did you get Coccion Construction Limited involved in the project?

They were put forward as a suitable contractor by a member of our design team who'd had previous experience of working with them. As this project had been really successful we decided to use Coccion for IDH.

What were you trying to achieve from the project?

Exactly what was delivered; a high quality project delivered on time and to the budget.

Were you kept up to date during the construction phase of any alterations and cost issues?

Coccion kept us informed throughout the project keeping us aware of the cost implications of any changes we made to the specification.

How was your working relationship with the construction team during the construction work phase?

I'd say the working relationship was first class. The Coccion team were very easy to work with as they understood what we were trying to achieve and were always responsive throughout the project, dealing with all our issues and any additional requests. We felt that we could rely on them to get things done.

Were you satisfied with project on completion?

Absolutely. We were completely satisfied with the finished project which met all our criteria in terms of quality, timescales and budgets.

Were you satisfied with Coccion's after care service?

It's never an easy subject but there were very few issues following the fit out and anything on the snagging list was dealt with in a timely and efficient fashion, so no complaints at all.

Do you have any future plans to use Coccion?

When the opportunity arises we'd love to work with Coccion again as they were completely professional in their work and genuinely nice guys to work with.
